PREPARING YOUR DEVICE

Backing up your Device

• Although most repairs don't require tampering with software and/or hard drives we highly recommend you backing up your device to iTunes on your computer or back up to the iCloud on your device to secure all your information, contacts, and media prior to repair. Please understand that these are electronic devices and anything can happen to them. Your device can be replaced but your data and photos can not and Apple Crack Repairs will not be held liable for the lost of that data. Your iCloud should be setup regardless of the repair or not. Unexpected water damage, lost, or damaged phone can occur at any time.

Request for Passcode

• Your device needs to be unlocked from any passcodes or you must provide us with your passcode.

• We need to access your phone to run a series of hardware tests to make sure every aspect of your device is working properly prior to the repair. At no time will a technician access your personal information or media.
